

Digital Interactives

umajin

Umajin Digital Interactives are narrative driven interactive 3D content focused on products, general data that can be extended to role playing, tactical simulation and e-learning.

The Umajin Editor makes it possible to build advanced digital interactives in days with animated characters, 3D content and gamified storytelling.

Examples

- Data and information
- Interactive Product and Service overviews
- Retail training toolkits
- First Responder and DHS training

In this example of a police trainer, voice recognition, multiple autonomous digital agents, full body tracking and realistic visuals immerse the users in the experience

The BrandZ experience powered by Intel has been showcased with the worlds top brands at the House of Lords in London, the New York Stock Exchange as well as in South Africa, Germany, Italy and Spain!
